

# Publishing your article in a fully open access journal with Hindawi

Open access payments made easy with your institution or funder

## Step 1

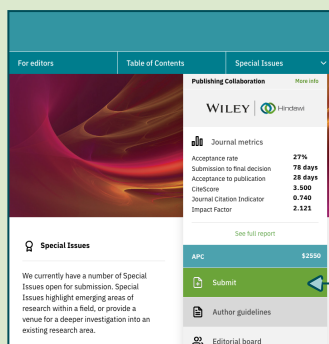

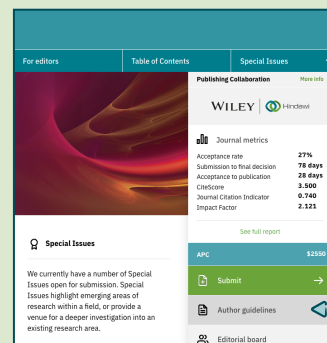

All Hindawi journals are fully open access - visit [www.wileyopenresearch.com/browsejournals](http://www.wileyopenresearch.com/browsejournals) and choose a relevant Hindawi journal for your research.

## Step 2

After selecting a suitable journal, you can find the specific submission guidelines via the **Author Guidelines** link that appears on each journal page on [hindawi.com](http://hindawi.com). You should ensure that you have reviewed these carefully and that your manuscript meets the requirements.

## Step 3

Once you have submitted your article by clicking the green 'Submit' button and providing all the information needed, the manuscript enters the screening process. **When prompted to agree to the APC during the pre-submission checklist, please do so.** Once the manuscript passes the screening process, the eligibility checks are performed in the back end of the system and **your institution is notified of your funding request and asked to approve.** This removes the need for any payment from you as an author, with no further action required.

## Step 4

If your APC funding request is approved by your institution or funder, you will receive an email confirmation.

## Tip

When submitting your manuscript, please use your institutional email address and include full institutional information. This will make the verification process easier and ensure that your funding is accurately applied.
